PERSONAL PROJECTS

Musicify WebSite using HTML, CSS, JavaScript (08/2024)

- A modern web-based music player developed using HTML, CSS, and JavaScript, offering song playback and album addition. The project utilizes HTML for structure, CSS for styling and layout, and JavaScript for interactivity. It features a user-friendly interface where users can browse a collection of songs and play music seamlessly.

Smart Water Level Monitoring System Using ESP-32 and Ultrasonic Sensor (06/2023 - 08/2023)

- It employs modern technology to provide real-time data, enabling better water management and preventing issues like overflow or water scarcity.

Traffic Signal Control using Microcontroller 8051. (01/2023 - 06/2023)

- A traffic signal control system using a microcontroller 8051 is designed to manage traffic lights at intersections to ensure a smooth and safe flow of vehicles.

CERTIFICATES

Introduction to Python (COURSERA) (01/2021)

I successfully completed the skill development training program on Introduction to Python using python from Coursera.
